

ATH-DSR9BT

# Purity of Digital Sound

## Digital Sound Reality Wireless Headphones

Delivering pure digital audio from music device to driver, the new ATH-DSR7BT and ATH-DSR9BT over-ear headphones give listeners unprecedented sound quality from a wireless signal. These are the first headphones to employ Audio-Technica's innovative Pure Digital Drive system, which supports 24-bit/48 kHz wireless audio transmission, while removing the need for sound-degrading D/A conversion. So you no longer have to choose between wireless operation and great-sounding audio. [audio-technica.com](http://audio-technica.com)
