

Connected

Network Microphones
with Direct Dante™ Protocol

Operating over a simple Ethernet connection, Audio-Technica's ATND971 Boundary Microphone, ATND8677 Microphone Desk Stand, and ATND931 Gooseneck and ATND933 Hanging Ceiling-Mount Microphones keep you connected and in control like never before. Experience the industry's first wired microphone solution to transmit audio and control data together over the Dante network protocol. The plug-and-play audio works with any Dante-enabled device, while the integrated control function is compatible with software from a growing list of providers, including Biamp, Bose and Symetrix. Audio-Technica Network Microphones: get connected, take control. audio-technica.com
