

VM520EB
Dual Moving Magnet
Cartridge (included)

Compatible VM Styli

High-Fidelity Heritage

Introducing the AT-LP7 Fully Manual Belt-Drive Turntable

Built around Audio-Technica's innovative VM phono cartridge line and classic J-shaped tone arms, the AT-LP7 emphasizes the critical role of the cartridge and supporting structures in producing high-fidelity audio from vinyl. The turntable's VM520EB Dual Moving Magnet Cartridge is compatible with six styli in the VM line, giving users an easy means of adjusting the turntable's performance, while the tone arm features a metallic gimbal suspension system and precision bearings for excellent tracking. The incorporation of anti-resonance materials and a speed-sensor system for accurate motor control completes the package, delivering high-fidelity analog audio reproduction you may have thought was a thing of the past. audio-technica.com
