

Remote-Mountable Receiver Units

Anywhere Wireless

System 10 PRO Digital High-Fidelity Wireless Systems

As the digital high-fidelity wireless system that works anywhere, in any situation, for anyone, System 10 PRO is the easy choice for 24-bit, interference-free performance. Operating outside the soon-to-be-restricted 600 MHz band, and featuring groundbreaking remote-mountable receiver units and the simultaneous use of up to 10 channels, System 10 PRO gives you the flexibility to work on both large and small stages with confidence. System 10 PRO installs quickly and efficiently in your live rig and requires no special technical know-how to operate. It truly is the wireless system for any band anywhere. audio-technica.com
